

Chris Ogier, CP

Chris Ogier has been engaged in the remote sensing and Photogrammetric profession for over 25 years. He is an ASPRS Certified Photogrammetrist (#1574). Mr. Ogier is currently employed by Airbus Aerial (Atlanta, GA) specializing in the acquisition and aggregation of multi-sensor imagery. His day-to-day role includes Business Development and Project Scoping and Project Management projects as a Solutions Executive. Chris's expertise includes Photogrammetric mapping of large areas, including both ortho-imagery and lidar of statewide efforts in Indiana, Ohio and Maine, and large-scale projects associated with over eight different US State Departments of Transportation and the Federal Highways Administration, among others. Chris's primary role at Airbus Aerial includes management of cross-platform data acquisition projects, including manned aircraft, satellite and unmanned systems. Mr. Ogier's body of work includes projects throughout North America and the western Hemisphere. Chris is a graduate of Appalachian State University with a Bachelor of Science Degree in Geography. He is a former MAPPS Board Member and Legislative Affairs Committee Chair, a former Georgia URISA Board Member and Executive Committee Member of the Georgia Geographic Information Systems Coordinating Council (GISCC).
